

Obsah:

Conversions	1
Physical constants	2
Standard decimal prefixes	3
Metric conversions	4
Temperature conversions	5
Error conversions (ppm)	6
Discrete components	7
Resistor color code	8
Standard resistor values	9
Practical capacitor models	10
Practical capacitors vs. ideal capacitors	11
Capacitor type overview	12
Standard capacitance values	13
Capacitance marking and tolerance	14
Diodes and LEDs	15
Analog	16
Capacitor equations (series, parallel, charge, energy)	17
Inductor equations (series, parallel, energy)	18
Capacitor charge and discharge	19
RMS and mean voltage definition	20
RMS and mean voltage examples	21
Logarithmic mathematical definitions	22
dB definitions	23
Log scale	24
Pole and zero definitions and examples	25
Time to phase shift	26
Amplifier	27
Basic op amp configurations	28
Op amp bandwidth	29
Full power bandwidth	30
Small signal step response	31
Noise equations	32
Phase margin	33
Stability open loop SPICE analysis	34
Instrumentation Amp filter	35
PCB and wire	36
PCB conductor spacing	37
Self-heating of PCB traces on inside layer	38
PCB trace resistance for 1oz and 2oz Cu	39
Package types and dimensions	40
PCB parallel plate capacitance	41
PCB microstrip capacitance and inductance	42
PCB adjacent copper trace capacitance	43
PCB via capacitance and inductance	44
Common coaxial cable specifications	45
Coaxial cable equations	46
Resistance per length for different wire types (AWG)	47
Maximum current for wire types	48
Sensor	49
Temperature sensor overview	50
Thermistor	51
Resistive temperature detectors	52
Diode temperature	53
Thermocouple	54
A/D conversion	55
Binary/hexadecimal	56
A/D and D/A	57
Quantization	58
Signal-to-noise ratio	59
Total harmonic distortion	60
Signal-to-noise ratio	61
Effective number of bits	62
Noise frequency	63
Setting time	64
