

Curiosity HPC Development Board je nový, jednoduchý vývojový kit, pre 28 a 40 pinové 8-bit PIC® mikrokontroléry v DIL púzdre.

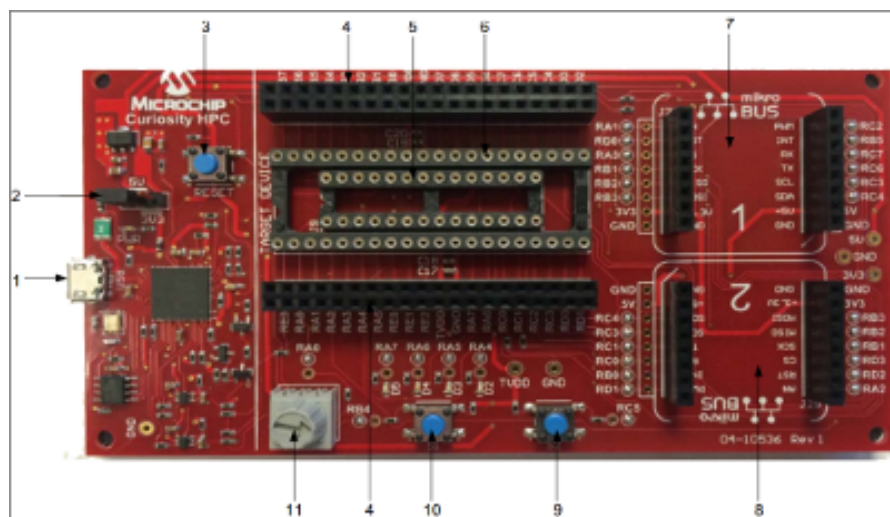

Kit obsahuje integrovaný PICkit™ programátor/debugger a spolupracuje s vývojovým prostredím MPLAB-X (verzie 3.30 a vyššej), alebo MPLAB-X Xpress.

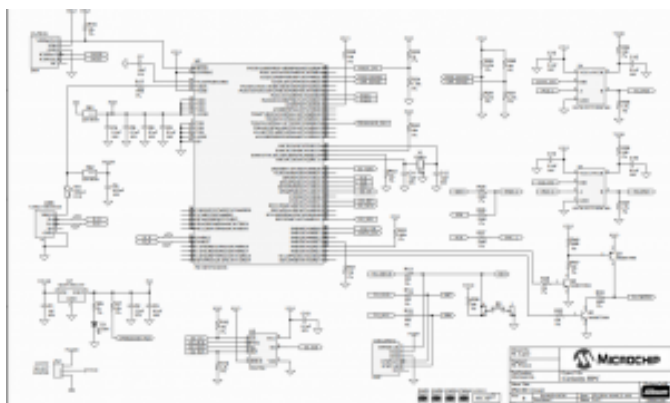

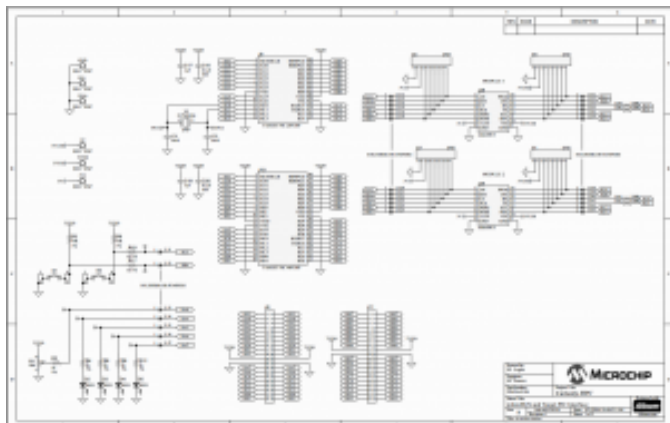

V balení nájdete okrem kitu aj jeden mikrokontrolér [PIC16F18875](#).

Vlastnosti

- 1. USB micro connector
- 2. 3.3/5V power jumper
- 3. Master Clear Reset button
- 4. Dual-row expansion headers
- 5. PIC® MCU socket for 28-pin microcontroller
- 6. PIC® MCU socket for 40-pin microcontroller
- 7. mikroBUS® Click Board socket 1
- 8. mikroBUS® Click Board socket 2
- 9. Push button SW2
- 10. Push button SW1
- 11. Potentiometer
