Purpose for release

- Update TrueSTUDIO to Eclipse Mars version 4.5.2 and CDT version 8.8.1
 - Dark theme finally available out-of-the box
 - MQX TAD kernel-aware debug plug-ins support
 - Many more platform bug fixes and improvements
- Enable Eclipse p2 update system and Eclipse Marketplace
 - This simplifies adding 3rd party plug-ins into Atollic TrueSTUDIO
- CMSIS-Pack to support import of software component such as
 - Example projects from ARM device manufactures who use these definitions for their MCUs
 - Up-to-date ARM CMSIS libraries
 - Ecosystem middleware stacks and libraries
- Updates to the TrueSTUDIO Project Wizard
 - Support for "CMSIS RTE C/C++ Project"
 - "Embedded C and C++ Project" to includes device search field and information field

Because this is a beta release, not all of the above features will be fully implemented.
