

27.04.2010

[IAR Embedded Workbench® for STMicroelectronics STM8 1.10](#)

Highlights:

- New product
- Supports STM8A, STM8L, and STM8S series
- Configuration files for all STM8 devices
- STice hardware debug support
- ST-LINK hardware debug support

[Download 30-day evaluation edition](#)

[Download 8kB KickStart edition](#)

27.04.2010

[IAR Embedded Workbench® for ARM 5.50](#)

Highlights:

- Support for ARM Cortex-M4
- Graphical visualization from trace data of call stack, variables and interrupt activity in single timeline window
- Position independent code and data (PIC/PID)
- Profiling based on ETM trace capture

[Download 30-day evaluation edition](#)

[Download 32kB KickStart edition](#)

22.04.2010

[IAR Embedded Workbench® for TI MSP430 5.10](#)

Highlights:

- C99 support
- Support for new TI MSP430 devices
- Improved optimizations

[Download 30-day evaluation edition](#)

[Download 4/8kB KickStart edition](#)

[Download Evaluation edition for TI wireless solutions](#)

11.03.2010

[IAR Embedded Workbench® for Renesas SuperH 2.10](#)

Highlights:

- New product
- Support for SH-2A and SH2A-FPU cores
- E10A-USB support with trace functionality
- Elf/Dwarf internal object format

[Download 30-day evaluation edition](#)

[Download 32K KickStart edition](#)

10.03.2010

IAR Embedded Workbench® for Atmel AVR32 3.30

Highlights:

- IAR Information Center
- Debugging multiple images
- 64-bit OS Support
- Updated device support

[Download 30-day evaluation edition](#)

[Download 32K KickStart edition](#)

10.03.2010

IAR Embedded Workbench® for HC12 & S12 3.20

Highlights:

- Information Center
- Debugging multiple images
- IAR visualSTATE build integration
- 64-bit OS support
- MISRA C:2004 support
- Support for new devices
